Profile

As a passionate MERN Stack developer, I combine technical expertise with a strong problem-solving mindset to create robust and innovative web applications. With a focus on crafting seamless user experiences and optimizing performance, I am dedicated to delivering high-quality software solutions. My versatile skill set encompasses both frontend and backend technologies, making me a well-rounded developer capable of bringing projects from conception to deployment.

Education

Bachelor of Information Technology, BBSUL Karachi

APRIL 2021 – Current

Associate's Degree in Electronic, TCPI Karachi

2019-2021

Matric in Computer Science, WHESS Karachi

2006-2018

Courses

MERN STACK, Bano Qabil

2022 – 2023

Entrepreneurship Development Program, IBA

2019

Internships

Frontend Developer, Coderatory, Karachi

JUL 2023 – DEC 2023

My time as a Front End Intern at Coderatory was the kickstart of my career. During this time, I had the occasion to work on a range of systems that helped me develop my chops in HTML, CSS, Bootstrap, Tailwind, JavaScript, and React.

Projects

Filmy Verse [🔗](#)

Filmy Verse is a film website where I implemented templates for adding films, along with features for adding ratings and comments. This project was developed using React and Firebase. I actively contributed to this project as a means of enhancing my skills and gaining practical experience in web development

OneClickDigital [🔗](#)

OneClickDigital is Pakistan's premier insurance and takaful aggregator, where I played a significant role in the frontend development. This project, built with Next.js, TailwindCss, MUI, and MongoDB, was a key part of my internship. I contributed actively to its development, enhancing my skills in frontend technologies and project management
